

Functions / Methods

$sum(a, b) \{$
 $c = a + b$
 $\}$ c is my answer

public static int sum(int a, int b) {
 ↳ Parameters
 Args.

$int c = a + b;$

return c;

cout ()

1, 2, 3, 4, 5, 6

t is test cases

$$7 - \boxed{\cdot} = 6$$

$$7 - 3 = 4$$

Doctor's Clinic:-

$$N = 4$$

$$X = 5$$

(X can't be greater than 10; if it's then take X as 10)

$$4 \times 5 = 20 - 5 = 15$$

A B C D

$$(10 - 3) \times 4 = 28$$

$$(10 - \overset{5}{n}) * (1 - 1)$$

$$5 \times 3 = 15$$

$$(10 - \overset{5}{x}) * (11 - 1)$$

$$5 \times 3 = 15$$

$$(10 - 5) \times 3$$
